**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 31 October 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1 and 3-6 is/are pending in the application.

## **DETAILED ACTION**

### ***Response to Amendment***

Applicant's arguments filed 10/31/05 have been fully considered. Regarding the rejection in view of Crozet et al the Examiner new interpretation is described in the grounds of rejection below.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, "withdrawal prevention portions... being formed along with a plurality of cutting lines" is ambiguous. As claimed, the withdrawal prevention portions and cutting lines are two separate elements which is incorrect.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 5 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for withdrawal prevention means being a claw portions, does not reasonably provide enablement "withdrawal prevention portions... being formed along with a plurality of cutting lines". As claimed, the withdrawal

Art Unit: 3738

prevention portions and cutting lines are two separate elements which is broader than that taught by the specification.

The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "withdrawal prevention portions".

### ***Allowable Subject Matter***

Claims 3-4 and 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application

by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Note that the Examiner interpretation of the reference has changed. Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Crozet et al.

Referring to 2, Crozet et al teaches an intervertebral cage inserted between vertebrae of a spine comprising:

a main body defined by a pair of upper and lower surfaces 6 and a pair of side surfaces connected thereto (a first side is interpreted as the surface wherein duct 14 is formed, a "side" does not have to be limited to a lateral or medial side; the pair would include any other side surface 8); and withdrawal prevention portions (pins 26 and the saw teeth) formed on the upper and/or the lower surfaces of the main body and regulate an insertion direction of the intervertebral cage; and wherein the withdrawal prevention means are formed along with a plurality of parallel cutting lines slanting at a predetermined angle with respect to one of the side surfaces (surface in which duct 14 is formed) of the main body.

Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by McGahan et al (2003/0130737).

Referring to at least Figure 4, McGahan et al teaches an intervertebral cage inserted between vertebrae of a spine comprising:

a main body defined by a pair of upper and lower surfaces 12, 14 and a pair of side surfaces (including elements 24 and 26) connected thereto; and

withdrawal prevention portions formed on the upper and lower surfaces of the main body, and being formed along with a plurality of cutting lines 31 slanting at a predetermined angle with respect to one of the side surfaces of the main body,

wherein the withdrawal prevention portions regulate an insertion direction of the intervertebral cage.
